Lighthouse Tariff Response

Dear Valued Partners,

As you are aware, new Tariffs rules have been issued by the US Government. In order to manufacture many of our products, we source materials from many companies all over the world. At this time the Tariffs will have an effect on our cost structure. We are forced to pass this on to our customers. Going forward, we will be adding a line item Tariff charge of 10% on all current and future orders.

If there are any future changes in the tariff structure, we will make the necessary adjustments.

We appreciate your understanding on this matter. If you have any questions or concerns, please feel free to reach out to us.

Kind Regards,
Michael Held
General Manager
